Dear Mr. Weisberg,

On and off again, I get interested in J.F.K.'s assassination. For me, it all started in the early 1970's when I first read "Six Seconds in Dallas".

My interest again was sparked during the 25th anniversary. Also, about two years ago Robert Groden moved into the county where I live. It is Delaware County, southwest of Philadelphia.

I just recently purchased his book "High Treason". He did such a great job. It seems to me to be the most comprehensive synthesis of the evidence ever presented.

In his bibliography, Robert has listed books that he feels are the most important. Of course, your books are listed.

I only have one of your books, "Oswald in New Orleans", but I am very interested in purchasing your other books. All of them. Could you please inform me on how I can purchase them. I need to read them.

Robert speaks very highly of you, and I feel that I need to read your

books before I go on with my other reading and research.

In all my reading, I am very interested in one aspect of this ordeal, and that is the "tramps". I understand that some researchers feel the tall tramp is Charles Harrelson, who is in prison for killing a judge. Others feel the short tramps is Fred Lee Crisman.

Robert is 90% sure that the short tramp is Crisman. He has used his photo enhancement as evidence. Why would these two people be behind the Grassy Knoll.

When the stories came out a few years ago about the tramps being Hunt and Sturgis, I thought it was ridiculous because it didn't even look like them. However, I have seen the pictures of Crisman, there is no doubt in my mind.

We know that Harrelson is a killer, but if it is Crisman, why does it matter. Who is he?

Well, have to go. I am in the process of reading "High Treason." I hope to hear from you soon.

Sincerely Yours,
Richard Pagano
